Membership Campaign**
Achieve with us!

As a Member of The Arc of Delaware County, what are you supporting?

Membership in The Arc of Delaware County may only cost a few dollars, but it's priceless when advocating for and supporting nearly 400 local children and adults who have intellectual and other developmental disabilities in achieving personally fulfilling lives.

Local Community Impact!

People supported by our organization play many important roles in their local communities. For instance, Kevin serves as a mentor for The Arc of Delaware County's Share Learn Grow Mentorship Program with local schools. He's also a volunteer "Assistant Coach" at Andes Central School, leading children in Kindergarten & 1st grades in a variety of games and exercises.

Kevin is one of many who help at area schools.

With a passion for animals, Jan spearheaded a drive that provided much needed supplies to an animal shelter in her community.

Nationally Recognized Workforce!

We take great pride in the dedication, professionalism, and level of care our staff provide.

The Arc of Delaware County was a 2010 National Award Winner of the Moving Mountains Award for Best Practices in Recruitment, Retention and Training of Direct Support Professionals. People from organizations all over the country visit on a regular basis to learn about our best practice approaches.

Additionally, we've had 2 winners of the National ANCOR Direct Support Professional Award for NYS since the award's inception just 7 years ago, specifically, Heidi in 2013 and Jessica in 2008.

Advanced Learning & Partnerships!

The Arc of Delaware County's partnership with SUNY Delhi has opened worlds of opportunity and fulfillment.

Several individuals have taken courses of interest such as art, psychology, and culinary arts. Some work with SUNY Student 'Study Buddy's', which has enriched the college experience for everyone involved. Brenda completed SUNY's Basic Food Preparation Lab and immediately put her new skills to use in planning and preparing a dinner for The Arc's Board of Directors. She looks forward to obtaining employment in a restaurant and keeps her skills fresh by regularly preparing specialty dishes while working in the cafeteria at The Arc's Hamden facility.

Several SUNY students engage in internships and Service Learning projects at The Arc's various locations, gaining experience and college credit.
